

Marouane Ennebly

Product Designer

I'm a Senior Product Designer with 7 years of experience who genuinely loves building products not just designing screens, but obsessing over the problem, shipping the thing, and watching real people use it.

Lately I've been deep in AI: designing conversational assistants, exploring how AI changes the way people interact with software, and using AI tools myself to prototype and build faster than ever.

I've taken products from zero to real users, worked with enterprise clients across multiple industries, and I care about work that actually lands not just looks good in a presentation.
